

# Ikon Science Software License Matrix 2024.4

|        |   |   |  |   |
|--------|---|---|--|---|
| BASE   | <b>RokDoc PLATFORM</b><br>Prerequisite: none<br>License feature: RokDoc_View_Only                         |   | Activates all data import & most export ( <b>not LAS</b> ), well viewer, seismic line viewers, pre-stack gather viewer, cross-plots, limited RokDoc 3D functionality (session building; Scene 3D; cross-plot; spectra plot; map viewer), RokDoc workflows, log editing, <b>no RokDoc 2D</b>                      |   |
|        | FUNCTIONALITY   | KEY ASPECTS   | PREREQUISITE   | LICENSE FEATURE                           |
| SHARED | Shared RokDoc Functionality   | Activates LAS export, RPMs, 1D/2D PDFs, limited blocky ops, limited multi-well ops, limited batch ops, programmers (log; DVS; horizon), limited RokDoc 1D (Vp/Vs/Rho log prediction; log filtering), limited RokDoc 3D  | Activated by any one <b>MODULE</b> licence feature   | no directly corresponding license feature |
| MODULE | <b>ROCK PHYSICS</b><br>Prerequisite: RokDoc Platform<br>License feature: RokDoc_Expert                    |   | Activates all shared RokDoc functionality, full blocky ops, full multi-well ops, full batch ops, standard RokDoc 1D (including wavelet estimation/stretch&squeeze; fluid substitution; synthetic gather generation; AVO analysis), standard RokDoc 2D, integrated WellTie  |   |
|        | FUNCTIONALITY   | KEY ASPECTS   | PREREQUISITE   | LICENSE FEATURE                           |
| ADDONS | Advanced Well Tie   | Activates wavelet estimation methods for broadband seismic (including Bayesian and parametric constant phase estimation)  | Rock Physics   | RokDoc_Adv_WellTie                        |
|        | Anisotropy  | Activates all anisotropy functions (including blocky anisotropy; Thomsen parameter estimation; log anisotropy model builder; anisotropic synthetics; RokDoc 2D geological modelling anisotropy; RokDoc 3D azimuthal anisotropic analysis)   | Rock Physics   | RokDoc_Anisotropy                         |
|        | VSP   | Activates all VSP functions (including VSP analysis; 3C and 4C anisotropic VSP analysis; walk-away and walk-around analysis)  | Rock Physics   | RokDoc_VSP                                |
|        | Attrimod  | Activates Attrimod (multi-2D seismic forward modelling tool)  | Rock Physics   | Attrimod                                  |
| MODULE | <b>RESERVOIR CHARACTERISATION</b><br>Prerequisite: RokDoc Platform<br>License feature: RokDoc_QED_Upgrade |   | Activates all shared RokDoc functionality, horizon toolbox, standard RokDoc 3D (including full geological modelling; fluid substitution; synthetic generation; Bayesian classification; spectral merge; RPM forward/reverse modelling; multi-realisation analysis; create angle stacks; 3D quantity calibration) |   |
|        | FUNCTIONALITY   | KEY ASPECTS   | PREREQUISITE   | LICENSE FEATURE                           |
| ADDONS | Seismic Inversion   | Activates in RokDoc 3D seismic data conditioning workflow, petrophysical reflectivities, various methods of inversion (including simultaneous; PP-PS sim inv; model-based; coloured; band limited), radon demultiple, PP-PS alignment   | Reservoir Characterisation   | RokDoc_Inversion                          |
|        | Advanced SDC  | Activates in RokDoc 3D advanced seismic data conditioning (including time shift estimation; dip estimation; structure oriented filtering; frequency slice filtering; gradient stabilisation; spectral shaping)  | Reservoir Characterisation   | SDC_ADV                                   |
|        | Ji-Fi   | Activates 'interactive' mode joint impedance facies inversion (Ji-Fi) method in RokDoc 3D (including PP-PS) and 'export 3D'   | Reservoir Characterisation   | Ji_Fi & Ji_Fi_Export                      |
|        | Ji-Fi Advanced  | Activates 'interactive' mode for several advanced Ji-Fi methods (including IQP; depth; timelapse) in RokDoc 3D and 'export 3D'  | Reservoir Characterisation   | Ji_Fi_IQP & Ji_Fi_IQP_Export              |
|        | Delivery  | Activates access from RokDoc 3D to CSIRO's petro-elastic inversion method known as Delivery   | Reservoir Characterisation   | RokDoc_Delivery                           |
|        | 4D Reservoir Monitoring   | Activates 4D enabled RokDoc 3D plus all 4D functionality  | Reservoir Characterisation   | 4D_Reservoir_Monitoring                   |
|        | PRESSURE PREDICTION   | Activates all shared RokDoc functionality, PressureView, vertical stress (overburden) generator, shale trend, normal compaction trend, pore pressure calculator (comprising stress ratio trend; Poisson's ratio trend; fracture pressure calculator; FPC QC plot), PPFG workflows |  |   |
| ADDONS | FUNCTIONALITY   | KEY ASPECTS   | PREREQUISITE   | LICENSE FEATURE                           |
|        | Geomechanics  | Activates image log interpretation, geomechanical workflows, Mohr-Coulomb plot, stress polygon plot, various calculators, various stereonets, geomechanics calculators in RokDoc 3D   | Pressure Prediction  | RokDoc_Geomechanics                       |
|        | Seismic Pressure Calculator   | Activates in RokDoc 3D limited geological modelling, seismic velocity calibration, seismic pressure calculator, geobodies   | Pressure Prediction  | Seismic_Pressure                          |

## EXTRAS [for RokDoc]

| FUNCTIONALITY                                    | KEY ASPECTS  | PREREQUISITE                                 | LICENSE FEATURE        |
|--|--|--|------------------------|
| <b>External Interface</b>                        | Activates the External Interface for Python plug-ins (logs/DVS/gathers/RPMs/quantities/pressure sets)  | RokDoc Platform                              | RokDoc_PluginsFunction |
| <b>Deep QI</b>                                   | Activates rock physics machine learning, deep neural network (DNN), random forest, support vector machine, XGradient Boost (XGB), unsupervised clustering, DNN & XGB multi-mineral petrophysics, exploratory data analysis | RokDoc Platform                              | Deep_QI                |
| <b>MPI</b>                                       | Activates cluster-based distributed processing for 'export 3D' realisation for Ji-Fi; time shift estimation; dip estimation; structure oriented filtering; frequency slice filtering                                       | RokDoc Platform + Reservoir Characterisation | MPI & MPI_Export       |
| <b>RokDoc Interconnector plug-in for Petrel*</b> | Activates numerous bi-directional functions including Vs log prediction, synthetic generation, wavelet extraction, RokDoc 2D/3D modelling, integrated WellTie, save as .rok, import .rok                                   | RokDoc Platform (+ Rock Physics) + Petrel*   | RokDoc_PETREL          |

## STANDALONE WELLTIE [independent of RokDoc]

| FUNCTIONALITY   | KEY ASPECTS  | PREREQUISITE | LICENSE FEATURE                 |
|---|--|--------------|---------------------------------|
| <b>Standalone WellTie with Interconnector plug-in for Petrel*</b> | Activates standalone WellTie with QC summary table & sequential workflow (including cross-plot; Vp prediction; Vs prediction; Rho prediction; log editing; depth-time conversion; wavelet estimation/stretch&squeeze), plus bi-directional link between Petrel* & standalone WellTie | Petrel*      | RokDoc_WellTie & WellTie_PETREL |

|      |   |   |
|------|---|---|
| BASE | <b>CURATE DATA ACCESS</b><br><br>Prerequisite: none<br>License feature: Curate_Base | Activates Curate platform, project creation & access, limited data export, data set & document listing/preview/download, 'collaborative workspace', map-based data visualisation, quick data filtering options, spatial polygon selection, user permissions [admin role only] |
|------|---|---|

|             |  |   |
|-------------|--|---|
| BASE+MODULE | <b>CURATE DATA CONSUMER</b><br><br>Prerequisite: none<br>License feature: Curate_Base & Essential_Apps | Activates all Data Access functionality, plus; Data Explorer app, Mapping and Contouring app, Well Correlation app, Well Viewer app, Seismic Viewer app |
| ADD ON      | <b>FUNCTIONALITY</b>   | <b>KEY ASPECTS</b>  |

|        |                          |   |                               |                   |
|--------|--------------------------|---|-------------------------------|-------------------|
| ADD ON | <b>Well Surveillance</b> | Activates WITSML feed, pressure view, mudweight view, overpressure view, pore pressure model, fracture gradient model | Data Consumer or Data Manager | Well_Surveillance |
|--------|--------------------------|---|-------------------------------|-------------------|

|             |   |  |
|-------------|---|--|
| BASE+MODULE | <b>CURATE DATA MANAGER</b><br><br>Prerequisite: none<br>License feature: Curate_Base & Essential_Apps & Data_Admin & Admin_Tool | Activates all Data Access & Data Consumer functionality, plus; Admin Toolkit app (all data loading & standardisation; data model management), data & presentation settings |
| ADD ON      | <b>FUNCTIONALITY</b>  | <b>KEY ASPECTS</b>   |

|        |                          |   |                               |                   |
|--------|--------------------------|---|-------------------------------|-------------------|
| ADD ON | <b>Well Surveillance</b> | Activates WITSML feed, pressure view, mudweight view, overpressure view, pore pressure model, fracture gradient model | Data Manager or Data Consumer | Well_Surveillance |
|--------|--------------------------|---|-------------------------------|-------------------|
